## UA AlfaGold – New high yielding open pollinated certified canola.

6 King Genetics is offering UA AlfaGold – a University of Alberta Open Pollination (OP) certified canola seed for the 2016 growing season.

A pre-emergent herbicide (Edge) should be used and can be spring applied. This seed is ideal for global markets.

This seed variety is subject to a royalty and upon payment it can be reused/replanted for one year.

### Features

- Excellent yield potential
- Blackleg resistant
- Certified seed
- Good standability
- Shatter-resistant pods
- Low cost

### Details

- Yield: 116.7% of checks
- Flowering: 3.5 days later than checks
